CLOUD PBX
ECN SOFTPHONE APP

ECN Softphone App enables PBX users to make voice calls using their mobile smartphone devices. The ECN Softphone App is supported by both Android and Apple iOS. By using the ECN Softphone App and service, providers need less time to launch their services delivering a quick and simple solution to their customers.

ECN SOFTHONE APP SUPPORTS POPULAR FEATURES SUCH AS:

- ✅ Supports app-to-app voice calls as well as off-net calls.

- ✅ It can be used with supported Bluetooth headsets.

- ✅ Push notifications ensure that customers receive calls or messages while the app is running in the background (and uses very little battery load) or isn't launched.

- ✅ Includes all tools and resources your employees need to be productive no matter where they are.

- ✅ Provide better customer experience.

- ✅ Outperform the competition with higher-quality audio calls.

- ✅ Allows for simultaneous ringing across all registered devices - desktop. laptop, and smartphones on both Android and iOS.
