CLOUD PBX
ECN WEB DIALER

The ECN Web Dialer enables PBX users to make audio/video calls and record conversations using their desktop browsers. The ECN Web Dialer is supported by major browsers such as Google Chrome, Firefox, Safari and Safari and service providers need less time to launch their services delivering a quick and simple solution to their customers.

ECN WEB DIALER SUPPORTS POPULAR FEATURES SUCH AS:

- Call recording - end users can record their conversations, Play the recordings, and download them.
- Voice calls to external numbers - end users can make off-net voice calls to external phone numbers.
- Cloud PBX Contact List.
- Recent calls - end users can look through the list of the last 10 calls and promptly call back.
- Call history - end users can look through the list of all incoming and outgoing calls, play or download the call recordings and make a new voice/video call to a specific contact.

BENEFITS

- ECN Cloud PBX end users can make and receive audio/video calls from anywhere using only their browser.
- Service providers need less time to launch their services and thereby become more competitive in the marketplace.
- Browser-based solution for quick voice and video calls.
- Uses Web RTC.
- View Presence Status of Your Colleagues.
- Supported by most major browsers.
