VIRTUAL FAX

Solution Overview

Virtual Fax is the first fax solution of its kind in South Africa, utilising Fax over IP technology that works all the time. With a proven track record in all sectors of the market, Virtual Fax is a must for any business.
Virtual Fax users can send faces directly from their email without any additional software required. With unlimited users and per second billing on all faxes sent, clients can now truly enjoy cost savings regarding their fax operation and utilisation.
Clients can port their existing fax number from their current provider to Virtual Fax, and change their existing fax number into fax to mail without changing the number. Once the number is ported the line can be cancelled with the current provider, allowing for another cost saving. Virtual Fax allows users to log into their Fax server platform at any given time to retrieve and view faxes.

Features and Benefits

✓ All faxes sent and received through Virtual Fax are archived for 10 years at no charge.

✓ All faxes sent are billed at per second billing.

✓ All faxes sent are charged at reduced rates.

✓ Virtual Fax can integrate into any MFP device or in-house software e.g. SAP etc.

✓ Virtual Fax manages all your faxing so that you can concentrate on what you do best: your business.
