

ECN ENTERPRISE FIBRE

ENTERPRISE FIBRE SOLUTION OVERVIEW

ECN Enterprise Fibre is a Ethernet symmetrical service providing bandwidth options of 10-1000Mbps. It provides clients with the highest security, transparency and reliability required to move business-critical data. High-speed availability offering to SME and Corporate providing a stable and secure service in which to deliver internet services and high-quality voice.

Data and voice are transmitted via a dedicated fibre link from your office to the nearest ECN data centre. Ethernet services are designed to address the increasing demand for high-speed data services and offers high-speed, reliability of communication and enhanced secure connectivity over ECN core network.
